# SMOOTHER WITH RENEWED SURFACE

Surfaces are now smoother with the Exclusive series,  
More aesthetic with soft edges  
It enables advanced water drainage with deeper double arc system.

With upgraded surface of  
**EXCLUSIVE**  
Series

# ROOFTILE TYPES

The roof tile is one of the most important building blocks of a building. It is applied on each other with a certain riding distance by clamping each other side by side. Thanks to the dual channel water discharge line in the side clamps, professional snow drainage is provided. Roof tiles interlocked with zero error can be fixed with screws and nails through the mounting holes. This provides resistance to large storms. Concrete roof tiles that we produce in various colors add value to your projects.

# WHY ONUR ROOF TILE?

Waterproof

Resistant to  
wind and rain

Economic

High retractive and  
incline resistance

Produced in  
desired color

Doesn't  
contain bacteria

Mounting is  
fast and easy

Ecologica

Nonflammable

Shipping is easy  
and affordable by  
factory location

Manufactured  
without hand and  
last technology

Guaranteed  
against water  
and cold

# TECHNICAL SPECIFICATIONS

- 42 CM × 33 CM × 5 CM
- 4,4 KG
- 10 PIECE/ M<sup>2</sup>
- 240 PIECE/1 PALETTET
- 5 PACKAGE 40 PACKAGE PALETTET

It performs hot and cold insulation.

Montaing Hole.

It has successfully passed the tests at -40 degrees Celsius.

Water absorption rate is 1%.

Provides easy water drainage with double arc system.

10 tiles fit in 1 square meter

Softened front surface chamfer.

It provides water tightness with a lock system.

Box

# LET YOUR ROOF BREATHE

## ONUR OPTI 120 ROOF WATERPROOFING SHEETING

nanotechnology  
Thanks to it breathes,  
it doesn't leak.

## ONUR RIDGE VENTILATION TAPE

roof ridge tile under the ridge  
ventilates the bottom  
prevents water intake.

## XPS THERMAL INSULATION BOARD

While ensuring the adhesion of the tiles,  
it provides high level of thermal insulation  
without leaving an air gap.
